Objective

Additional clients

Education/Training

High School Graduate   1996-2000
Terra Linda High, San Rafael CA

Santa Rosa Jr. College   2002
Applied Tech/CAD Drawings

Training in Web/Data Development, app design and best practices.   2004
This has been a mixture of reading technical publications, attending webinars and presentations, utilizing learning tools as a member of SQL Server Central.com, taking courses with Learn iT! bay area training gurus, hands on training, and working with peers.

Work Experience

Headworks Inc.   12/2004 - 11/2007
Programmer/Developer

Designed and maintained web and desktop applications for Wells Fargo Bank. Created web based reports leveraging SQL server reporting services. Created and maintained many DTS packages for nightly load processes and reporting speed. Created web sites and data back ends which integrated into other systems within the bank. Dynamic data driven web development.

Neo Craft (Self Employment) Estd. 10/31/2007
Programmer/Developer

Neo Craft is my own small business. I continue to fully support the web site and business database for Learn iT! a San Francisco based computer school. I also developed web sites for local businesses and non profits. Feel free to browse my website at http://www.neo-craft.net/Pages/NeoCraftPortfolio.htm for further examples of work performed.

Qualifications

SQL Server 2000/2005
Strong background with SQL server implementation; Creating normalized tables, stored procedures, triggers, indexing, DTS/SSIS packages, data discovery, auditing, Database Mail implementation with catchy HTML messages. Reporting Services, and hardening SQL server to Wells Fargo security specs.

SSRS
Developed reports with the BI Development Studio - upwards of 85 total production reports for Wells Fargo and Learn iT!

SSIS
Certificate of completion for MCDBA 2792A – SSIS. Exposure and implementation of processes to load data into other web facing systems. Developed processes which automate notifications, harnessing the SSRS report engine.

ASP.NET 1.1, 2.0, 3.5
I have developed web applications on these platforms. Responded to both the needs of stakeholders as well as integrating with legacy code bases for authentication and functionality. Strictly hand coding, never a WUSIWUG or drag and drop developer.

C#/VB.NET/VBA Programming (Since 8/2004)
Object Oriented programming experience. Developed well formatted and commented code for dynamic data driven web applications, custom .net modules for CMS (DotNetNuke) utilizing framework API. Developed with VBA behind all Access forms. Heavily involved in supporting Learn iT! systems, designing and developing new functionality into their custom school database operations.

Additional Qualifications
HTML (4 years)
CSS (2 years)
JavaScript (2 years)
Graphic Design (4 years)
Adobe Photoshop (4 years)
XML/XSL (1 Year)
Visual Studio.net 2003/2005/2008
Visual Interdev (Classic ASP Maintenance)
Access (4 years – Emphasis on VBA development)
Excel (2 years)
Word (3 years)
